

# *Under The Hood*

**BEST SCRUBBER**  
Because Your Hangar Deserves It.

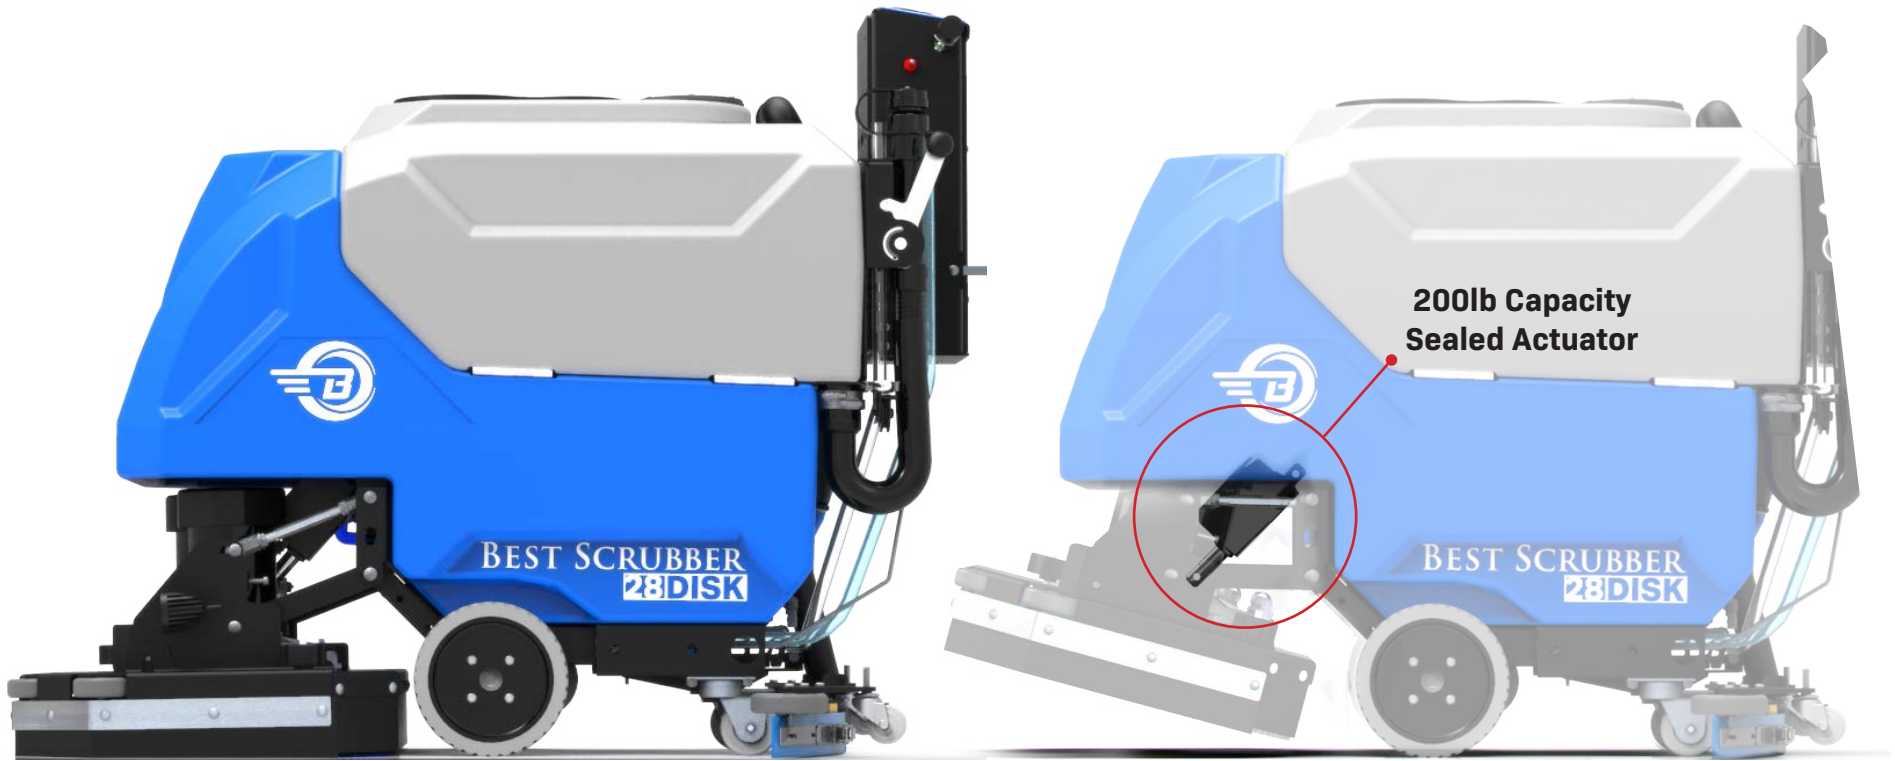

# *All Steel Frame Foundation*

**“Through Bolted” to steel frame, not the tanks. No tapped steel that could rust in time.**

# ***Powered Scrub Deck Up/Down***

**In a class where most have manual deck lifting, our machines have powered actuators for operator ease.**

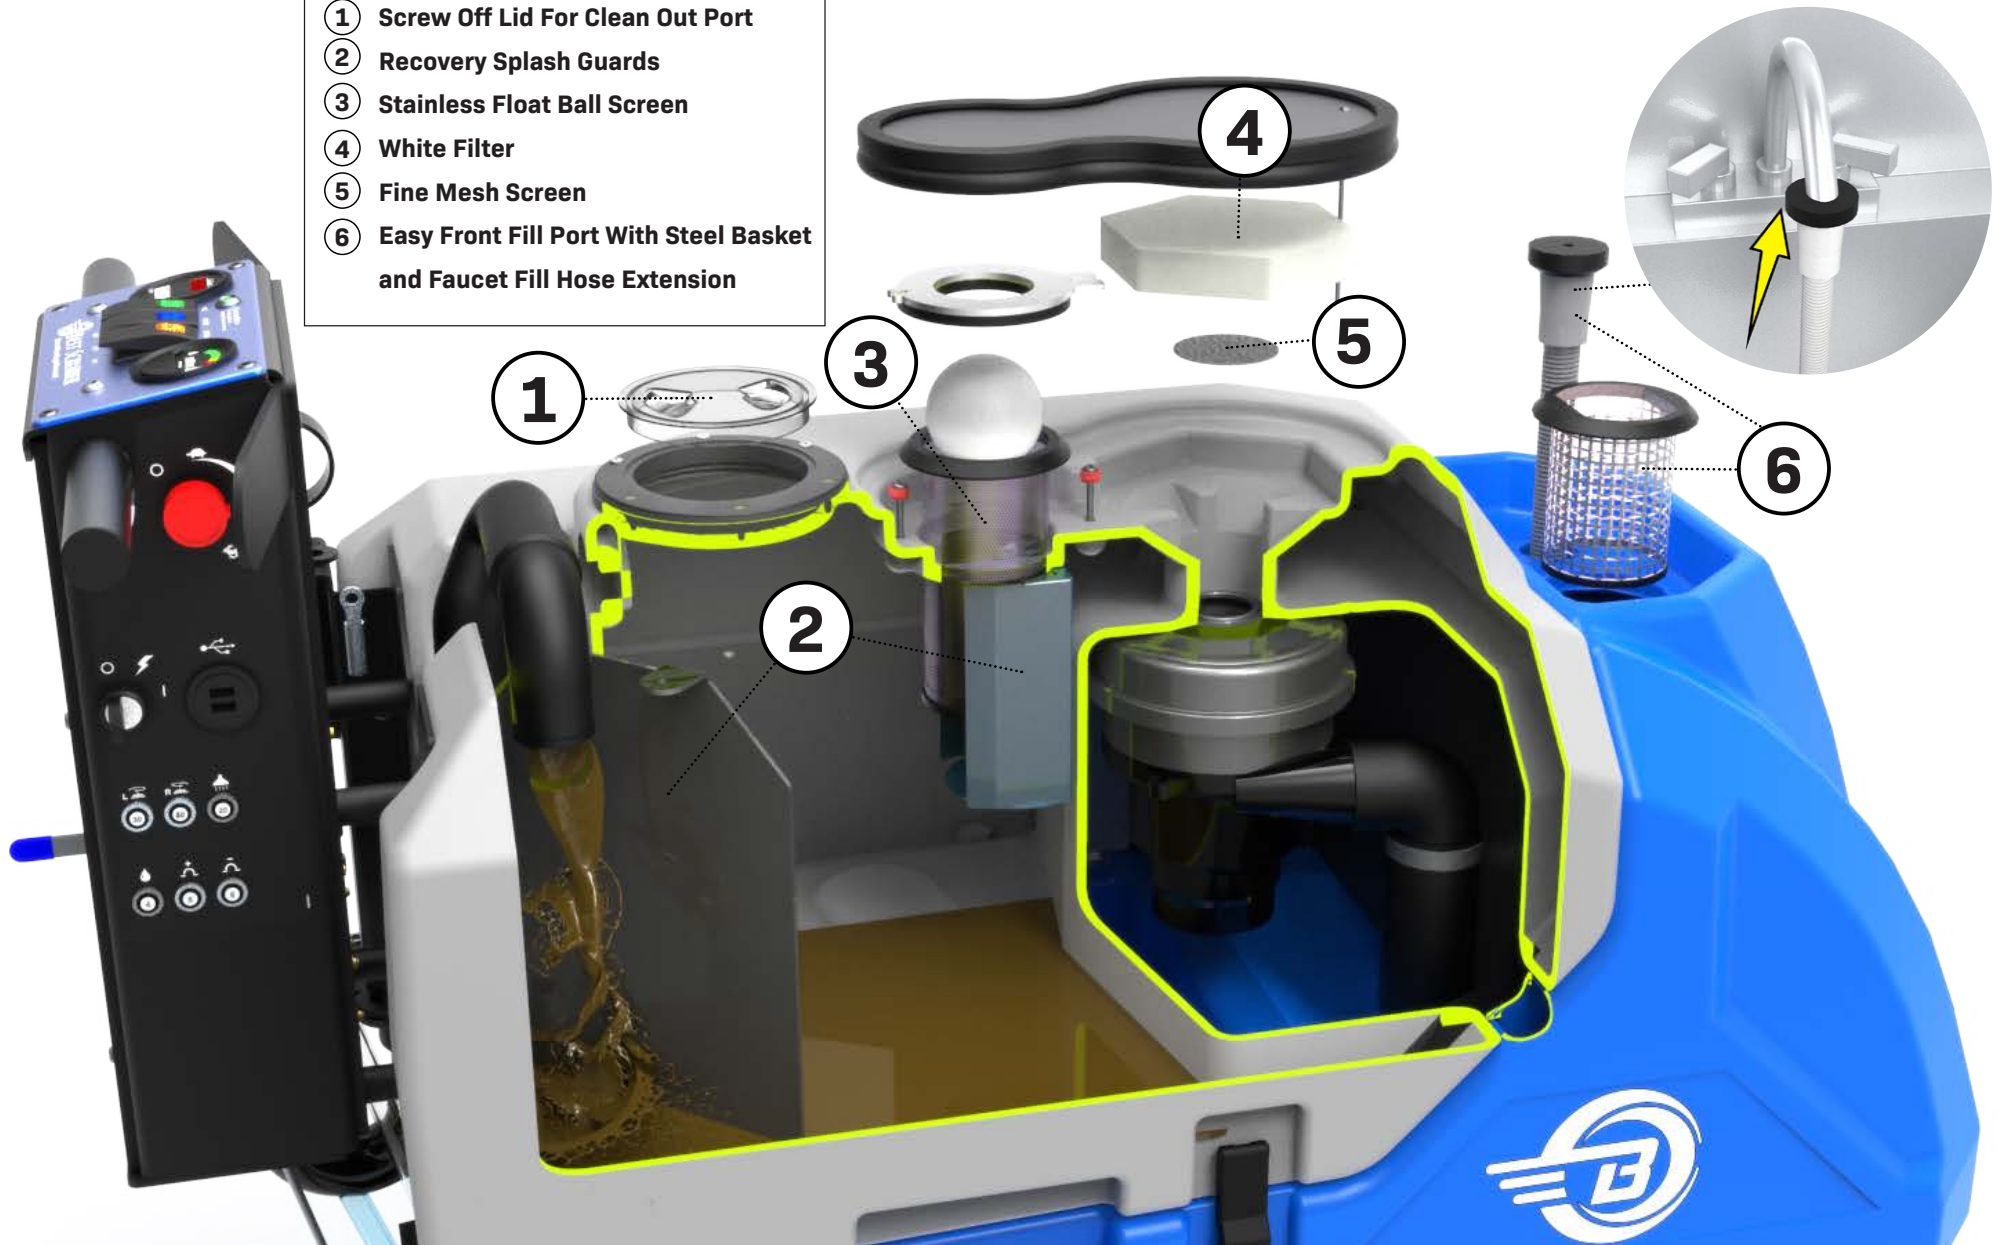

**Lowered Deck**

**Raised Deck**

# ***Vacuum Protection And Easy Fill***

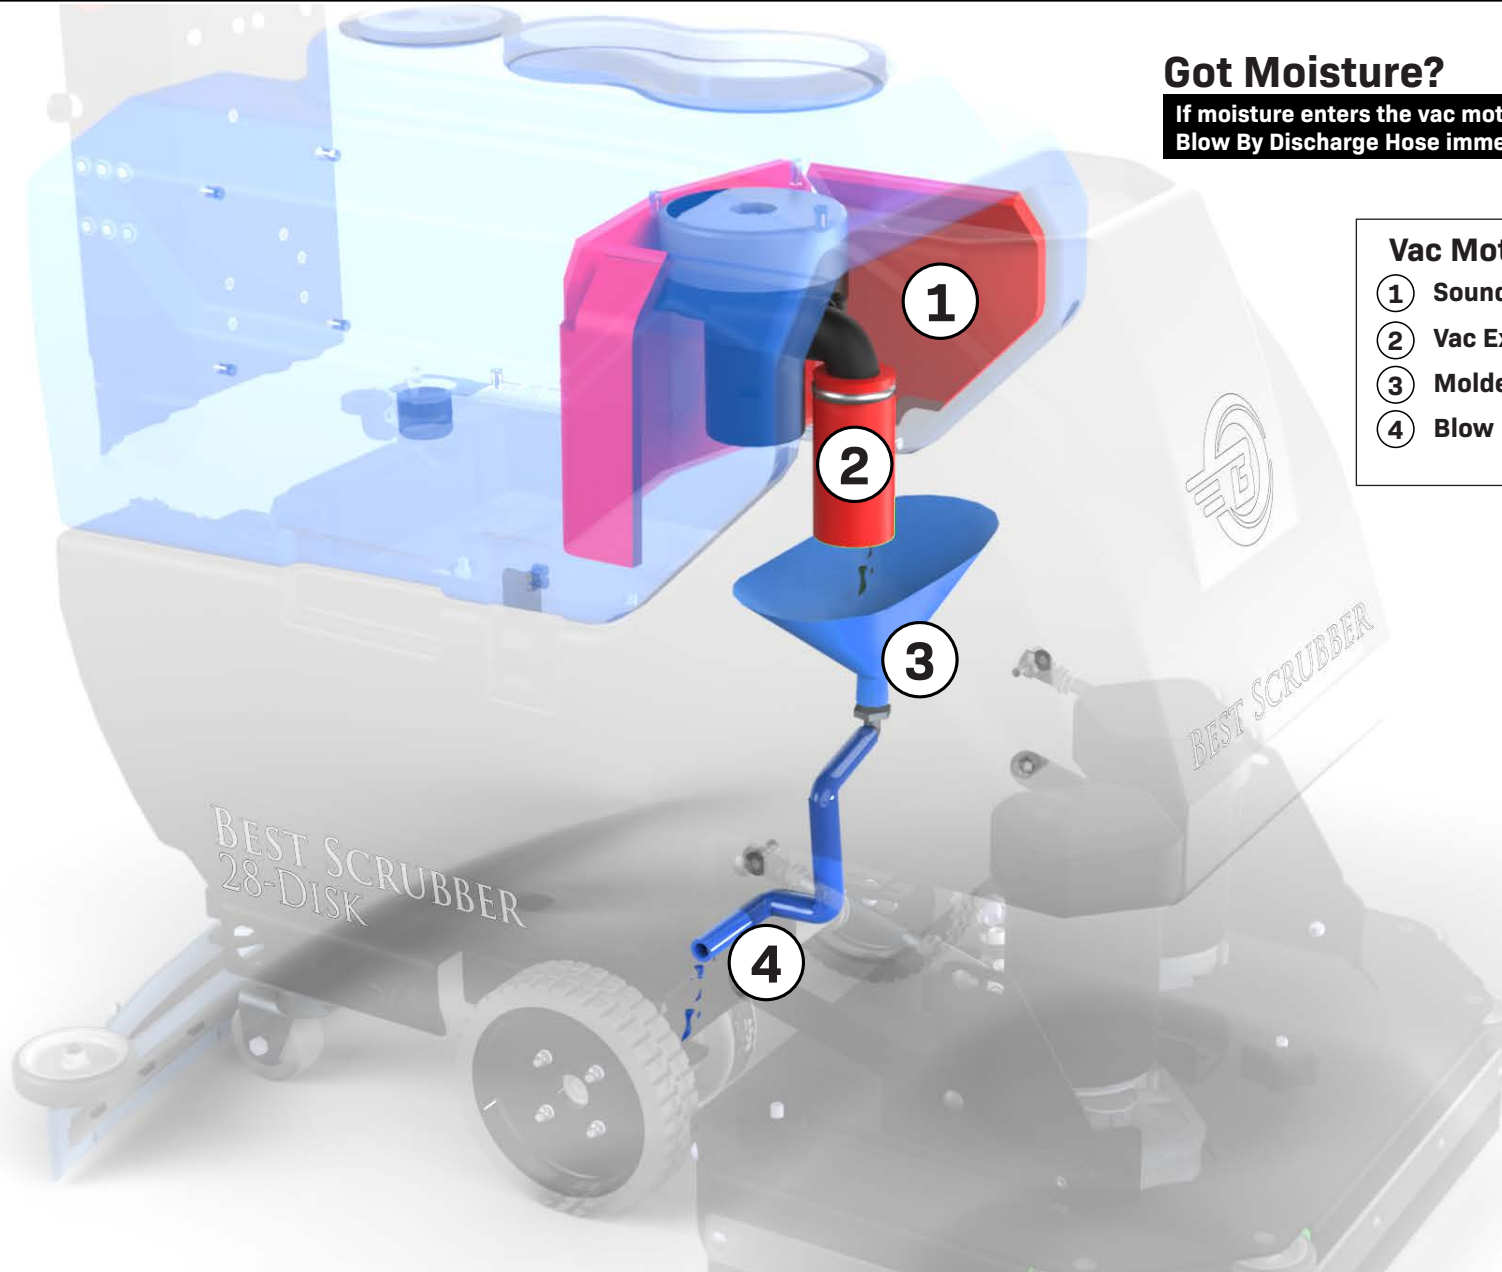

- ① Screw Off Lid For Clean Out Port
- ② Recovery Splash Guards
- ③ Stainless Float Ball Screen
- ④ White Filter
- ⑤ Fine Mesh Screen
- ⑥ Easy Front Fill Port With Steel Basket and Faucet Fill Hose Extension

# ***Vacuum Discharge Funnel***

## **Got Moisture?**

If moisture enters the vac motor it will be expelled via Blow By Discharge Hose immediately.

### **Vac Motor Blow By**

- ① Sound Absorbing Foam
- ② Vac Exhaust Muffler
- ③ Molded In-Tank Funnel
- ④ Blow By Discharge Hose

# Off The Shelf Components

## Keep It Simple

No expensive and proprietary membrane panels here. Our central command components are simply designed making service easier than ever. We build our boxes out of steel, maintaining the integrity of the components and the machine.

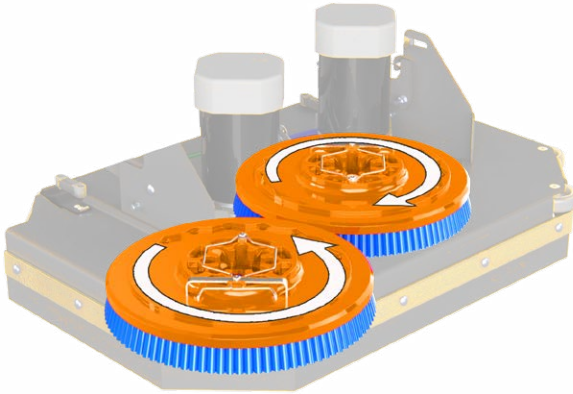

# Simple Controls

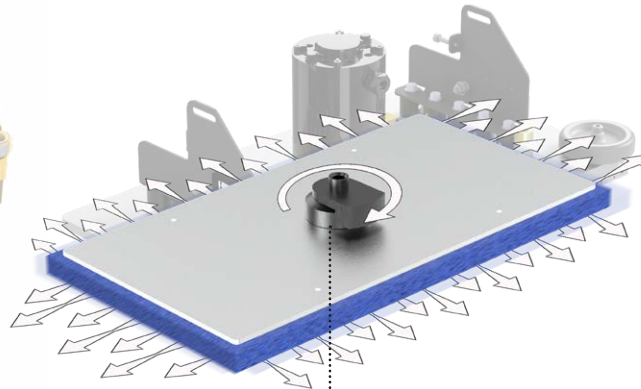

- ① Battery Meter
- ② Status Light
- ③ Vac Switch
- ④ Water Switch
- ⑤ Brush Switch
- ⑥ Down Pressure Gauge

# 3 Deck Types

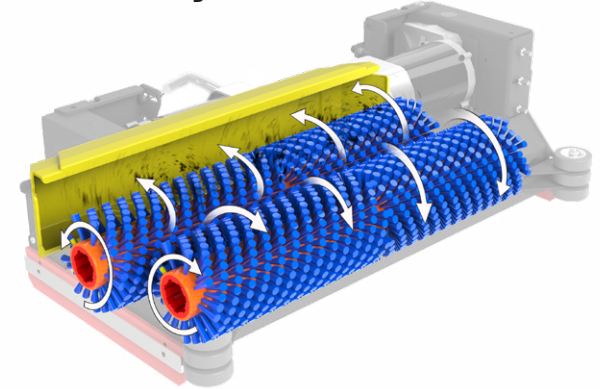

**Disk**

**Orbital**

**Cylindrical**

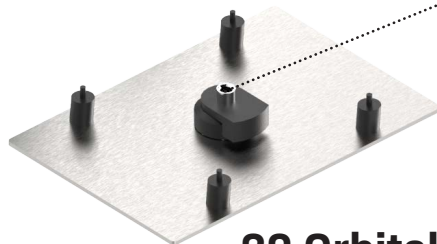

## 1 Shared Eccentric

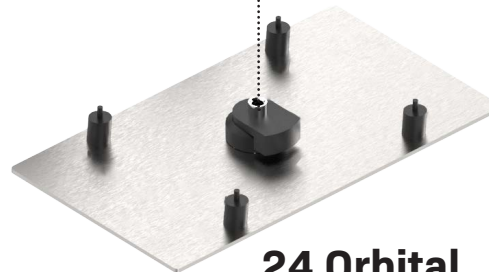

After 3 years in the field we found a 95% reduction in bearing failures on our Floor Machines. Due to this insight we redesigned all our orbital decks to share the same eccentric part.

## Advantages

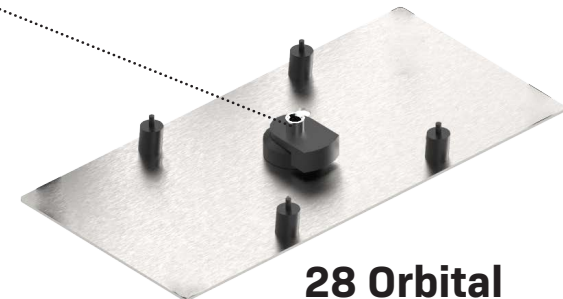

- Eliminates the potential for the incorrect eccentric weight to be installed in the field.
- Includes new double seal protection to guard against chemical and water intrusion into the bearing.

**20 Orbital**

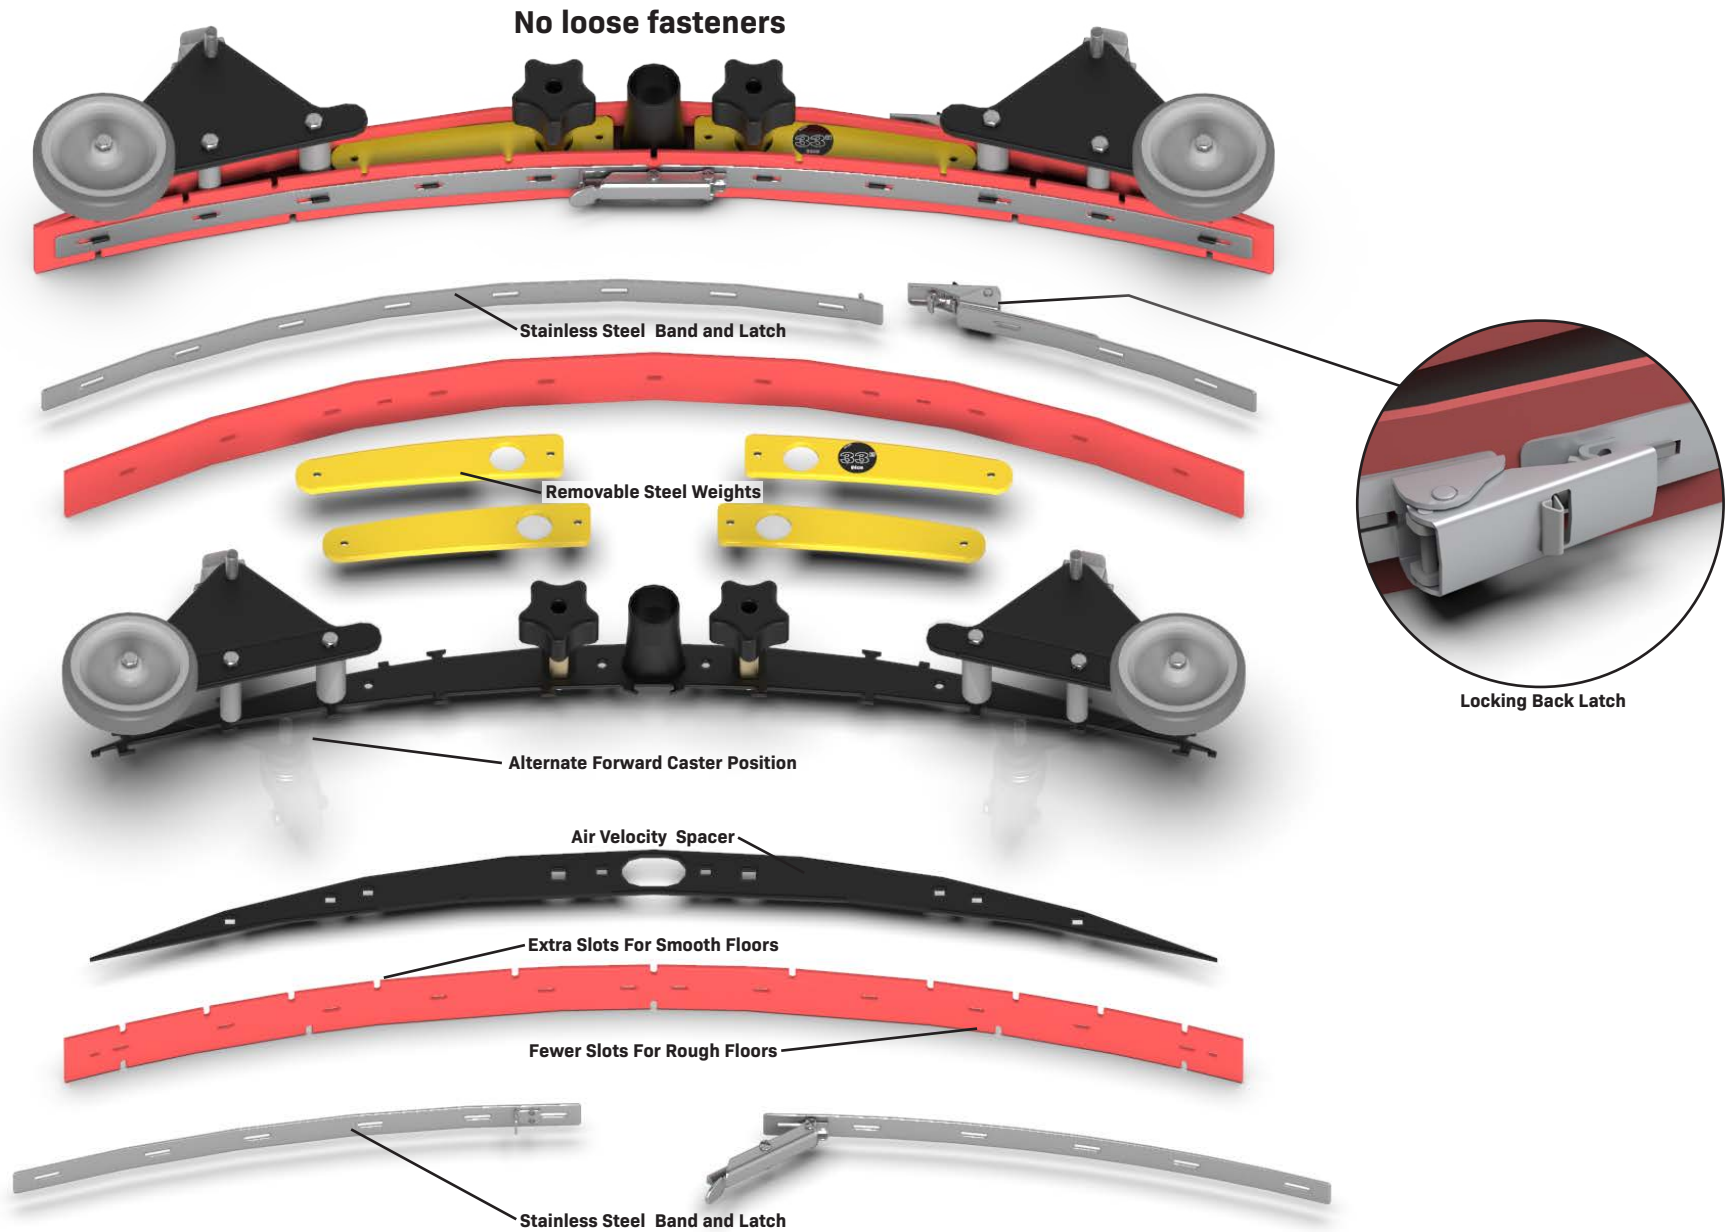

**24 Orbital**

**28 Orbital**
